

Make the World a Safer Place

**By creating the next generation of
self-sufficient leaders and
ambassadors of Safety,**

we help our clients to elevate their understanding of the Safety Lifecycle and Risk Management. Our goal is to improve their knowledge of how to run a safe facility, and more importantly, how to keep it running safely.

We help the world's largest operating and engineering companies improve facility uptime, manage process risk and comply with international safety standards. Our ultimate goal is to keep people safe by preventing man-made events with the potential to harm!

“ACM aims to recruit and develop passionate professionals, energized to do something bigger; principled individuals open to challenges and eager to learn; champions that embrace the importance of making the world a safer place!”

Discover what you do best with ACM!

Would you rather be a small contributor to a big company or

a big contributor to a growing company?

“From my first day on the job the leadership team asked for my opinion, they ask everybody.”

Who works at ACM?

At ACM there are no ‘small jobs’; we rely on all of our staff to contribute their skills and ideas to a wide variety of projects, regardless of title or rank. We believe in tapping into all the resources our team offers which means that when you come to work for us, we will work with you to discover your unique strengths and career goals in an effort to find the perfect fit for you at ACM.

We eat, sleep and breathe safety and rely on a skilled group that thrives on the fast-paced, multi-focused nature of projects that our vast portfolio of clients offers.

ACM employs highly-motivated people with a passion for safety and an insatiable appetite for learning.

“I thought I was done learning when I graduated. I was wrong. Working at ACM is like getting paid to continue my education.”

The people that are the most successful at ACM are those that are self-managed and are comfortable working with a minimum of direct supervision once they are clear on their goals.

Ultimately, if you are innovative, passionate about process safety, can liaison with clients directly and manage client expectations, you have the character, motivation and capabilities we need.

What's in it for me?

We offer our employees competitive compensation and unmatched experience.

"ACM ensures 'earning' compliments 'learning'!"

When you come work for ACM you get much more than on-the-job training; you get a serious career boost. Whether you are brand new to the industry, a recent graduate or a seasoned veteran, an ACM job comes with the added benefit of state-of-the-industry training with a strong leadership team offering unmatched, dynamic tutelage. If you have demonstrated a passion for Process/Functional safety and are keen to expand your Controls knowledge, we want you on our team!

ACM aims to recruit and develop passionate professionals, energized to do something bigger; principled individuals open to challenges and eager to learn; champions that embrace the importance of making the world a safer place!

The time you will spend with ACM, networking with big oil and gas companies, is guaranteed to make you better at what you do and will help equip you to achieve your career goals both within ACM and wherever your future takes you.

At ACM we have huge potential and want our business and our employees to grow together.

ACM's overall compensation package offers a competitive wage, a comprehensive benefits plan with a group RRSP, a 4 1/2 day work week and so much more!

We believe that motivated employees are the hardest working employees, which is why we reward our staff for achieving personal and team goals all year round.

"Great pay, great benefits, bonuses for hard work and a Celebration Team run by staff to find ways to reward staff? You don't find compensation like this anywhere else I've worked!"

Who is ACM?

Located in Calgary, Alberta, ACM Facility Safety is Canada's largest independent provider of Hazard Analysis, Safeguard and Risk Assessment services. Through our streamlined business units, we have helped the world's largest operating and engineering companies improve facility uptime, manage process risk and comply with international safety standards.
